Model 44HH with short raised panel design, long Horizon windows

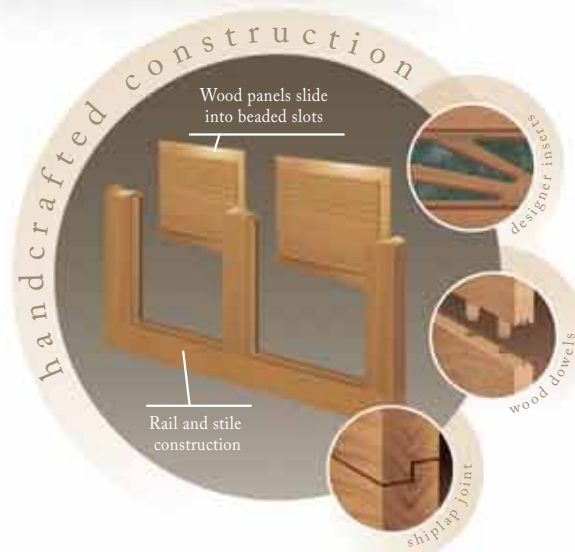

Model 44RR with short raised panel design, long Cathedral windows

Get the look you want and the ease of operation you require

All Clopay garage doors are built with care and craftsmanship. Each Model 44 Series door is constructed with wood dowel pin joints, glued for strength and stability. Machined shiplap joints in the meeting rails help seal out the elements to keep your garage dry and secure. The bottom rail can be trimmed to fit the contour of your floor for a tight barrier along the entire length of the door.

Finishing: The door must be properly finished prior to installation for the warranty to be valid. It is required that the door (inside, outside and all edges) be primed and painted with a high quality exterior paint or stained with a penetrating stain that is mildew and UV resistant and water repellent. Complete finishing instructions are provided with the door.

Maintenance and Care: Proper care and maintenance are imperative to the appearance, longevity and performance of a wood door. The door must be stained or painted every 1-2 years depending on exposure to the elements to protect and seal the door. Complete maintenance instructions are provided in the Installation Manual.

Garage door specifications are subject to change. Check with your Clopay Pro-Series Dealer for verification.

In the interest of better quality and value, we are continually improving and updating our products. Consequently, photos and illustrations may sometimes differ from present models.

Warm. Distinctive. Timeless. These are qualities that make a home stand out. With handcrafted raised panel wood garage doors in stain grade or paint grade options, yours is sure to be a focal point among the others on the block.

Warm. Distinctive. Timeless.

CLASSIC™ LINE

Model 44FP with long raised panel design

CLASSIC™ LINE of Wood Doors

Traditional Warmth and Character

If you want the warmth and character of wood and prefer a traditional panel design, the Model 44 Series from Clopay is a perfect choice. The versatility in wood species and panel designs makes this line suitable for traditional, Old World, contemporary and rustic log and timber style homes.

The Model 44 Series offers features not usually found in an affordably priced residential wood garage door – distinctive raised panels fabricated from the finest West Coast timber. Simply choose from a combination of three wood species: hemlock, cedar or redwood, select a short or long panel configuration, and perhaps add optional windows handcrafted from carved wood as a finishing detail. In either case, the door sections arrive face-sanded and ready to finish.

Wood Species

Redwood, Cedar & Hemlock

STILES/RAILS/PANELS	STAIN GRADE (Solid Stiles/Rails)			PAINT GRADE (Finger Jointed Stiles/Rails)		
	Redwood	Hemlock	Cedar	Hemlock	Hemlock	Hemlock
	44RR	44HR	44CC	44HC	44HH	44FP

Factory priming is available on Model 44FP and Model 44HH doors. Spot For Lag (SFL) drilling is standard on Model 44CC. Through Drill (TD) is standard on Models 44FP, 44HH, 44HC, 44HR and 44RR.

NOTE: Stain Grade doors are made with edge glued redwood, cedar or hemlock wood panels. Differences in grain and color variations are indicative of natural wood. These are not considered product defects. Paint Grade doors are made with exterior grade MDF panels. Paint Grade doors cannot be stained.
